Everyone eats food. Some people eat lots of fruit and vegetables, others may eat more or less meat, and some people may eat healthy, others may not. All of it is related to nutrition. Nutrition is the process of how people get the food that is needed to grow strong and healthy along with obtaining the necessary vitamins and nutrients to help bodies grow and function.

For children, good nutrition is especially important and it is necessary to eat healthy foods because kids are constantly growing. Good nutrition will lead to healthy bones and muscles, and without receiving the correct vitamins and nutrients while growing, a child will not grow as tall and as strong as they could be.

There are five main food groups that should be eaten each day. Eating a variety of foods in each group will lead to receiving most important nutrients to remain strong and healthy. The first food group includes grains such as cereals, rice, millets, breads, pastas etc. The second group is dairy, which includes milk, yogurt, cheese, butter and other dairy products. Apples, oranges, grapes, bananas and many more are part of the fruits group. Of course, vegetables, such as beans, broccoli, peas, carrots, corn, leafs, and many others, is in its own food group as well.
